HIBA AYOUB

FRONT-END DEVELOPER

React • TypeScript • JavaScript • SaaS • AI Integration • Data Visualization • 3D
hibaayoub248@gmail.com | linkedin.com/in/hiba-ayoub-34665b2bb

PROFILE

Front-End Developer with 6+ years of experience building React and TypeScript applications across SaaS, enterprise, and government projects. Experienced in reusable UI architecture, state and API integration, data visualization, AI-enabled workflows, testing, performance optimization, and interactive 3D experiences.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, Sass/SCSS, Less
Frameworks & Libraries: React.js, React Router
State & Data Management: Redux Toolkit, React Query, Axios
UI & Forms: Material UI, Ant Design, Bootstrap, Tailwind CSS, Formik
Data Visualization: D3.js, ECharts, Recharts, Highcharts, Apache Superset
3D Development: Three.js, React Three Fiber
Testing: Jest, React Testing Library
APIs & Development Tools: REST APIs, WebSockets, Firebase, Git, Postman, Swagger
Practices: Reusable Components, Responsive Design, Performance Optimization, Agile/Scrum

EXPERIENCE

Front-End Developer | Immersive Adventures Software Company **May 2024 – Present**
Remote | *Paris, France* | *A Learning App*

- Built the front end of a SaaS e-learning platform from scratch with React and TypeScript, including reusable Material UI components, Redux Toolkit state architecture, dynamic forms, protected routing, and REST API integration.
- Integrated backend-provided AI features into content workflows, including image generation, video/audio subtitle generation, and assessment-question generation.
- Improved quality and performance with Jest and React Testing Library, lazy loading, code splitting, render optimization, and client-side media caching.
- Extended an existing interactive 3D learning environment using Three.js and React Three Fiber.

Front-End Developer | InfoStrategic Information Technology Consultancy **Oct 2019 – Apr 2024**
Remote | *Dubai, UAE*

- Developed React and TypeScript front ends for enterprise and UAE government applications, including complex request-management workflows, reusable UI components, forms, state management, and REST API integration.
- Built analytics dashboards and custom visualizations with D3.js, ECharts, Recharts, Highcharts, and Apache Superset.
- Developed real-time chat interfaces and administration dashboards for AI-powered chatbot platforms, using WebSockets to support live, bidirectional communication for multiple UAE government entities.
- Handled production deployments, conducted code reviews, trained front-end interns, and mentored junior developers.

SELECTED PROJECTS

UAE Council for Fatwa Website (2023) — React front end with React Query API integration, accessibility, responsiveness, performance, and cross-browser usability.

AI-Powered Conversational Platforms (2020–2022) — Developed real-time chat interfaces and administration dashboards for AI-powered platforms, using WebSockets for live, bidirectional communication across multiple UAE government entities.

Electronic Notary & International Assistance Systems — Built end-to-end request-management workflows with React, Formik, reusable components, and REST APIs, covering creation, editing, submission, review, actions, and status tracking.

Apache Superset & Analytics Dashboards (2022) — Developed reusable React components, custom charts, visualization plugins, and data-driven dashboards.

EARLIER EXPERIENCE

Engineer & Vice Head of IT Department | Ministry of Culture **Dec 2015 – Sep 2019**
Tartous, Syria

- Supported the Syrian Cultural Gate website, coordinated IT activities, supervised technical staff, and resolved website and infrastructure issues.

EDUCATION & LANGUAGES

B.Sc. Information and Communication Technology Engineering – Information Technology | Tartous University | 2009–2014

Languages: Arabic (Native) | English (B2) | German (A1)
